It will probably take a few days to properly memorize all of the algorithms.

The Gear Cube is a 3-D combination puzzle designed and created by Dutch puzzle maker Oskar van Deventer based on an idea by Bram Cohen. It was initially produced by Shapeways in 2009 and known as "Caution Cube" due to the likelihood of getting one's fingers stuck between the gears while speedcubing.Later, in 2010, it was mass-produced by Meffert's as the "Gear Cube". Speedcubing (also known as speed-solving, or cubing) is a sport involving solving a variety of combination puzzles, the most famous being the 3x3x3 puzzle or Rubik's Cube, as quickly as possible.For most puzzles, solving involves performing a series of moves that alters a scrambled puzzle into a solved state, in which every face of the puzzle is a single, solid color. Method: CFOP The intermediate bracket is where the majority of speedcubers sit, and can remain in for quite some time. I view the intermediate stage of cubing as the period of time you spend learning the basic CFOP method until the point at which you're comfortable with F2L, and know all of the OLL and PLL algorithms. All this works offline and for free! CubeX is the only cubing app you'll ever need. CubeX offers two solving mechanisms. The Fridrich Solver and The Advanced Solver. Fridrich Solver gives you a layer-by-layer solution. This solver is based on the popular Fridrich Method (or CFOP Method) of solving the Cube.
